UVideo – Your life story is uploaded to video status- or simply UVideo-a free lifestyle mobile app that allows you to creatively upload your status. Developed by KWAI. XYZ Studios and released by KT Core, this handheld video app offers various editing tools for your photos and videos. It also allows you to upload your work on popular social media platforms such as Facebook and WhatsApp. Opens up more customization options for your situations compared to other apps and is great for easy editing. Get more creative!Uploading short video status has become a main feature in various social media apps. Commonly referred to as stories, these short video clips or images usually last only for 24 hours and mean frustrating alternatives that you don't want to manually remove from your timeline. The contents of these stories can range from anything you may have found interesting during the day or event you attended. Regardless, they can be found on almost all popular apps like Facebook, Instagram, and Snapchat.However, a lot of the limitation in this feature is that you can't customize it to your heart's content. This is usually because That's not an extensive design selection tool in variety and functions almost similarly to your phone's default photo editing features. You can have filters, augmented reality lenses, and Text overlays while you film, but after a while, you end up exhausting this and looking for more options. That's why UVideo became popular with its cool features. Not only does video recording immediately offers its various functionality that you can use for free. You can use your camera with the app to start recording your video status or taking photos for slideshows or still image status. Once recorded, you can quickly start customizing. The app allows you to add background music and turn it into a short music video using current trending tracks or your choice. You can also simply add filters, stickers, popular quotes, and even just plain text in your situation. Basic editing tools like Crop, Trim, and Resize are available for use, too. The app even enables you to remove watermarks - although it will add itself throughout the video. There is also the app's Move Image feature, which can turn your photos into animated photos. If you like choosing existing songs, you can even turn them into your own ringtone. Finally, if you're having a hard time making a situation, you can try using a pre-prepared status theme for a different mood. A feature in conflict with your all-in-all, UVideo is full of cool choices for full video or image to show online. However, while this is handy since you can easily upload them to your social media accounts, an automated watermark that shows up for any situation you have with the app can be discouraging, especially since the app allows you to remove other watermarks found on your images. It's still quite an innovative app, though, and is recommended for active social media users. Users.
